## PROJECTS

### My Online Profile

The Project was developed using **Bootstrap 4**.

The project Online Profile is a webpage which describes my details in a web page which also show my UI skills.

### Project Lockdown

This project was developed using the **ASP.net** technology along with **Materialize CSS Framework**.

During the COVID-19 pandemic this was an idea providing service between the workers and the lockdown security for ease in access for the authentic people to travel during the COVID-19 emergency.

### Jobwaala.com

The project was developed using **PHP** and **Bootstrap** technology along with **JavaScript** and **MySQL Database**.

The project was developed during the internship period. This project provided Job seeking Candidates and the Recruiters a platform to interact with each other.

### Project Re-Fuel

This project was developed using the **ASP.net** technology along with **Materialize CSS Framework**.

The project provides a service between the customer and the vendor which reduces the queue time which occurs at the peak hours of the petrol pump.

### Movie Duniya

The project was developed using **HTML**, **PHP** and **CSS** technology along with **JavaScript** and **MySQL**.

As the project is named movie duniya, it is understandable that the website provides the details about the latest movies, music videos, reviews as well as news regarding the movie world.

### E-Learning4BCA

The project was developed using **PHP** and **Bootstrap** technology along with **JavaScript** and **MySQL Database**.

This project was developed in the final year of BCA. This project allowed the students of our college to learn through our webpage.

### Fest-Reg

The project was developed using **VB6** and technology along with **Microsoft ADODC Database Setup**.

This project was developed during my graduation period. This idea allowed management of all the events going in the college.
