# Projects

### Re-Fuel
*Role-Full Stack Development*
*Durtion-3 Months*

This project is the latest project developed by me using ASP.net technology along with Materialize CSS Framework.
The project provides a service between the customer and the vendor which reduces the queue time which occurs at the peak hours of the petrol pump.

### Movie Duniya
*Role-Full Stack Development*
*Durtion-3 Months*

The project was developed using PhP and CSS technology along with JavaScript and MySQL. As the project is named movie duniya, it is understandable that the website provides the details about the latest movies, music videos, reviews as well as news regarding the movie world.

### E-Learning
*Role-UI Engineering*
*Durtion-3 Months*

The project was developed using PhP and Bootstrap technology along with JavaScript and MySQL Database.
The project provides material for studying for different subjects where the student can view note or videos along with subject tests.

### Fest-Reg
*Role-Full Stack Development*
*Durtion-3 Months*

The project was developed using VB6 and Microsoft SQL Server.
The project provides a system for maintaining and handling the events which are organized in schools or colleges.

### Online Examination
*Role-Java Development*
*Durtion-1 Months*

The project was developed using Java and JSP technology along in Swing.
The project was a mini project providing a set of objective questions and displaying the result in the HTML page using the JSP.
